Each year, they host two major events. They just completed their annual spring event — a music trivia night. The fall event is a Run/Walk/Breath event. The next event will be on Nov. 5 in Chesterfield. If you wish to support the walk/run, registration is open on their website, lungcancerconnect.org. St. Louis Radon would love for you to join their team.

“Sometimes it’s hard to separate the work I do for each organization,” Cherie says. “There is so much overlap in my efforts.” For Cherie, the most important part of her work is creating an environment where everyone is more aware of radon and its dangers. Someday, it will be common knowledge that radon causes lung cancer, just as it is with smoking. And since radon is the second leading cause of lung cancer, she also works to support efforts that lead to better screening and treatment. “I want to make sure that people have all the information they need to protect themselves and their families,” she says.

St. Louis Radon is a long-time partner with *Real Producers* magazine and often provides educational articles on the dangers of radon and how to mitigate related risks. Cherie would love the opportunity to speak at real estate offices, HOA and PTA meetings. Cherie also teaches CE classes for REALTORS®. She can be reached at 636-200-2875 or stlradon.com.
